VISYBL

Visybl AssetBeacon

Enabling Asset Awareness for the Enterprise

You need to know where your enterprise assets are, where they've been, who has seen them last. You want continuous, detailed, accurate inventory because it it critical to your business. And you want it all in a solution that is simple and economical to install and use.

Visybl is making that solution possible through the use of Bluetooth Low Energy (BLE), technology that is supported in most Apple and Android smartphones. Our BLE-based AssetBeacon turns your physical assets into tiny sensors, continuously transmitting information about their presence, temperature, movement, for years on a single battery.

You can communicate with AssetBeacons simply using your smartphone with Visybl's app installed. Or for autonomous, 24/7 monitoring use Visybl's CloudNode device.

Visybl AssetBeacons are designed with enterprise deployments in mind. Features include a serialized barcode, replaceable battery, screw/adhesive mounting, and LEDs to indicate status and assist in asset identification. AssetBeacons can also be custom configured to meet application needs, and offer battery life of up to 5 years.

As part of the complete Visybl Asset Awareness solution, AssetBeacons provide your business near-real time data for applications such as inventory control, process automation and analytics.

VISYBL

Physical

Size	1.75 x 1.85 x 0.35 in.
Weight	5 oz
Material	ABS

System

CPU	8-bit low-power
Battery life	3 - 5 years
BLE	2.4 GHz BT 4.0
Antenna	PCB trace

Environmental

Mounting	Screw/lanyard or adhesive
Sealing	IP54

Performance

Range	~ 500 feet LoS
Channels	Chan 37/38/39

Visybl CloudNode
